

Masterton District Council

At Large

Electing 5 Councillors

David HOLMES

For a constructive, honest and no nonsense approach to Council I will stand again.

I am concerned with local companies missing out on major contracts, especially when local firms have made competitive tenders.

Economic Development must be encouraged for more employment opportunities and excessive consultancy

fees must be reduced.

The Eagle Air service has been a success. Water, sewerage and services to the airport have provided opportunities for investment and recreational users. Hood is one of Masterton's potential growth areas.

Completion of the Wastewater upgrade, along with a sustainable use of the wastewater is paramount. This is Masterton's biggest project and with modern technology available wastewater can be a resource to be utilised.

I am very conscious of Council expenditure and will make sure ratepayer's money is spent wisely.

Masterton has good hospitals, great education facilities, lovely parks, sporting facilities, mountains and sea. I can help take Masterton forward.
