

Masterton District Council  
Rural Ward  
Electing 1 Councillor

---

## Graham MCCLYMONT

Masterton born and bred after 11 years away overseas returned to raise my two daughters with wife Teresa in 1991. We own GT Environmental Services Ltd and when time allows I enjoy fishing, scuba diving and golf.

I believe strong local businesses, which provide employment and training that attract and retain people, especially our young citizens, are essential to the region.

Our mainstays, farming and forestry, need good roading and the irrigation scheme would boost agricultural production.

My focus would be turning our rates dollars into tangible results using local expertise and business wherever possible.

My involvement in Kids Own Playground and Hockey pavilion projects shows what great results occur when council and community work together.

I believe council at present needs to concentrate on providing the infrastructure necessary for the district to prosper and grow.
