

Masterton District Council

At Large

Electing 5 Councillors

Jane TERPSTRA

I believe the best strategy for the Masterton Council and its residents is to minimise rate increases through sensible cost savings and common sense decision making. We need to adapt to the global financial situation while ensuring that Masterton remains a great place to live.

With four generations of my family living in the Wairarapa and two terms as a Councillor, including one as deputy mayor, I have an understanding of the important issues we are facing. To tackle these issues, we need Councillors who are prepared to put in the effort to be fully informed and who are able to contribute to potential solutions. I believe my education and strong work ethic enable me to make the right decisions for the Masterton district.

A vote for me is a vote for educated decision making and spending within our means while still ensuring Masterton is able to progress.
