

# Masterton District Council

## At Large

### Electing 5 Councillors

---

**Peter DEBNEY**

Masterton needs to be looking to its future, streamlining its infrastructures, future-proofing economic developments, building resources to meet the future needs and community expectations through to 2025 and beyond.

A sustainable resolution to the continued upgrading of the sewerage scheme, water treatment, roading, waste management, transport options can only succeed with the full participation and input of our community.

Masterton's current rating structures are unsustainable in the long term. All three Wairarapa District Councils must collectively maximise our resources and facilities, for the benefit of all urban and rural communities. An era of Wairarapa-regional co-operation to debate the issues and control rocketing rates must happen.

As a retired school principal, JP and long-time Wairarapa resident actively involved in community organisations I am committed to encouraging the widest possible community input, ownership and pride in what must be achieved.

Join me in planning today, for Masterton's future.
