(Details provided)

INSPECTIONS, MAINTENANCE AND REPORTING (ADDRESS THOSE ITEMS THAT APPLY)				
Minimum inspection and maintenance procedures:	Regular inspection and testing and planned preventative maintenance and responsive maintenance will be carried out in accordance with the nominated performance and inspection standard or document to ensure effective operation of the emergency lighting for the required duration in the event of a failure of the general lighting system.			
Inspection frequency and responsibility:	The system is connected to the building's emergency warning system therefore testing of the interface between the two systems will be carried out annually. Depending on the type of installation and its performance standard/document: Specifically designed solutions: by IQP only Six monthly by the IQP Standard / other document: Annually by IQP			
Reporting:	The owner will keep records of all inspections, maintenance and repairs undertaken in the previous 24 months. These will be recorded in the on-site log book or electronically, which will remain available with the most recent compliance schedule, and as a minimum include:			

- Details of any inspection, test or preventative maintenance carried out, including dates, works undertaken, faults found, remedies applied and the person who performed the work.
- Form 12A provided annually by the IQP
